DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: claims are allowable at least for the reason that the prior art does not teach or reasonably suggest the photocatalytic hydrophilic film that is formed by mixing silicon dioxide and titanium dioxide together in a mass ratio in the recited range and the film thickness in the recited range as set forth in the claimed combination.

Komatsu et al (US 2001/0030808 A1) discloses a reflecting mirror (Fig. 1A) having a substrate (16), a reflecting film (18) and a photocatalytic hydrophilic film that is formed of two layers (20, 22), titanium dioxide and silicon dioxide, but the photocatalytic hydrophilic film is not formed by mixing the recited mass ratio and the thickness.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
